1. During a job search, what are some strategies you can use to familiarize yourself with the company you are hoping to work for? Select all that apply. 0.75 / 1 point

☒ Understand the company's mission statement.

☒ Correct  
During a job search, it's beneficial to visit the company's website to learn about its history, understand the mission statement, and research the company on career sites.

☒ Research the company on career sites, such as LinkedIn.

☒ Correct  
During a job search, it's beneficial to visit the company's website to learn about its history, understand the mission statement, and research the company on career sites.

☒ Visit the company's website to learn about its history.

☒ Correct  
During a job search, it's beneficial to visit the company's website to learn about its history, understand the mission statement, and research the company on career sites.

☒ Contact the hiring manager to ask any questions you may have about the company before your interview.

☐ This should not be selected  
During a job search, it's beneficial to visit the company's website to learn about its history, understand the mission statement, and research the company on career sites. While it is appropriate to ask certain questions before an interview, you should not contact the hiring manager to ask questions you could easily find the answers to by researching the company yourself.

2. A successful portfolio may include data models, structured data, an A/B test, and data visualizations that you have worked on during this program. 1 / 1 point

☒ True

☐ False

☒ Correct  
A successful portfolio may include data models, structured data, an A/B test, and data visualizations that you have worked on during this program. It can also include linear regression and machine learning models.

3. While at an interview, you share your data experiences and portfolio. Which stage of the PACE framework does this describe?

1 / 1 point

- ☐ Construct
- ☐ Plan
- ☐ Analyze
- ☒ Execute

Correct

This describes the Execute stage. During your interview, you will put your plan into action to secure a position in the organization by sharing your experiences and portfolio, with the goal of taking the next steps in your data professional career.
