

Your Course 1 learning journey

In this part of the program, you explored how data professionals operate in the workplace. You also discovered ways in which data professionals contribute to an organization's vision. You investigated some modern industries that depend on the insights provided by data analysis.

Additionally, you learned about the benefits of a workflow in data analysis through PACE (plan, analyze, construct, and execute) and how it can help you navigate the technical and workplace expectations in a career.

Coming up, you'll be introduced to the Python coding language and discover how object-oriented programming can help you create powerful tools for data analysis.

For this discussion prompt, consider the following:

How have your views on data science and the process of data analysis changed since the start of this course?

How has your understanding of the data career space expanded?

What's an interesting element of the data career space you discovered that you didn't already know about?
