

Your Course 3 learning journey

In this part of the program, you examined how the elements of storytelling enrich the understanding of data and help those with whom we share our data with. You also practiced performing exploratory data analysis, finding trends, and developing insights to prepare data visualizations.

Coming up, you'll be introduced to statistics as the foundation of data science.

For this discussion prompt, consider the following:

How have your views on storytelling in data analysis changed since the start of this course?

How has your understanding of exploratory data analysis expanded?

What's an interesting element of exploratory data analysis you discovered that you didn't already know about?
