1. Fill in the blank: Tabular, XML, CSV, and J-SON files are all types of _____.

1 / 1 point

- ☐ data types
- ☒ data formats
- ☐ spreadsheets
- ☐ Python functions

☒ Correct
Tabular, XML, CSV, and J-SON files are all types of data formats.

2. It is a data professional's responsibility to understand data sources because the data's origin affects its reliability.

1 / 1 point

- ☒ True
- ☐ False

☒ Correct
It is a data professional's responsibility to understand data sources because the data's origin affects its reliability. Understanding data sources involves determining how and when to contact the people who either generated the data or are in charge of delivering it in order to inform data discovery.

3. Which Python method returns the total number of entries and the data types of individual data entries in a dataset?

1 / 1 point

- ☐ `Return()`
- ☐ `Total()`
- ☒ `Info()`
- ☐ `Number()`

☒ Correct
`Info()` returns the total number of entries and the data types of individual data entries in a dataset.
