Your Course 2 learning journey

In this course, you discovered fundamental Python concepts such as object-oriented programming, variables, data types, functions, conditional statements, loops, and data structures. You also explored how data professionals use code on the job.
Coming up, you'll learn how to find and tell meaningful stories using data.

For this discussion prompt, consider the following:

How have your views on programming and the Python programming language changed since starting this course?
How has your understanding of the Python programming language expanded?
What useful Python tools did you discover that you didn't already know about?
