Your Course 6 learning journey

In this part of the program, you learned to apply different classification techniques to business problems and practice developing a working familiarity with Naive Bayes, decision trees, random forests, gradient boosting machines, and K-means clustering.
Coming up, you will begin your capstone project!

For this discussion prompt, consider the following:

How have your views on data classification techniques changed since the start of this course?
How has your understanding of the use of different classification techniques expanded?
What's an interesting element of data classification techniques you discovered that you didn't already know about?
